Summer part 2

2020

Year 6 were some of the youngest children in the country to achieve their John Muir Discovery award in Year 4 and again the youngest to achieve the Explorer award in Year 6. John Muir was an environmentalist and one of the first people to understand how plants, animals and people all depend on each other.

You planted trees to make a new area of woodland that will be used by wildlife and children in the future.

Forest School when you were in Year 1

You took part in the national Polli:Nation project to create a wild flower meadow. Nationally this project achieved the National Lottery award for the environment.

Thank you to all the adults who have come out in rain or shine to help with our forest school sessions over the years.
