

## Overview

This half term we will be looking at how plants grow. We will be growing our own beans, labelling the different parts of a plants and finding out what plants need to grow.

### Important words

grow	When something gets bigger
season	The 4 periods of the year—spring summer autumn and winter. The normally have different weathers.
plant	Living things that grow from the soil.
flower	The part of the plant that blossoms. Flowers produce seeds that can become new plants.
stem	The stem supports the leaves and flowers of the plant
root	The root is normally hidden underground and gets water and food from the soil
leaf	The flat, green part of the plant attached to the stem. It collects sunlight.
