Year 1 Knowledge Organiser – Toys

1. How have the toys you play with changed?		2. How have toys changed over time?		3. What toys did my parents/grandparents play with?		4. What toys did children play with in the past?		5. What are the similarities and differences between the toys I play with and toys of the past?		6. Who were the significant people who brought change to toys?	
Children play with different types of toys as the get older. Toys are made out of different materials.	   	If something or someone is beyond our living memory, this means that it was around before we were alive. The first teddy bear was created in 1902 to honour an American President, Theodore Roosevelt.	 	Parents are a child's mums and dads. Grandparents are the mums and dads of a child's mum and dad. Parents and Grandparents are older than you. The toys that parents and grandparents played with depends on when they were born.	  	What kind of toys children played with depended on how much money the family had. Children from wealthier families played with toys such as clockwork train sets, china tea sets, dolls and dolls houses. Children from less wealthy families often played with homemade toys such as peg dolls and wooden boats or cars.	  	Similarities: - children play with toys for fun - some toys have existed for a very long time. Eg dolls, teddy bears, building blocks and balls. - toys have children learn, imagine and play with friends. Differences: - the materials they are made from have changed. - technology has changed the way some toys work. - older toys were often simpler and handmade, whereas newer toys are often brighter and mass produced.	  	The first teddy bear was created in 1902 by Morris Michtomto. Jigsaws were invented by John Spilsbury in 1767. Lego was invented by Ole Chrisiansen in 1949. Play-Doh was invented by Noah McVivker. He was trying to make a cleaning product. Scalextric was invented by B. Francis in 1956.
